

ECO PARYAVARAN LABORATORIES & CONSULTANTS

TRANSFORMING INDUSTRIAL GROWTH THROUGH ENVIRONMENTAL INTELLIGENCE

Environmental consultancy and testing businesses in India have experienced major changes in the last decade. Strict requirements from the CPCB (Central Pollution Control Board) and MoEF&CC (Ministry of Environment, Forest and Climate Change), together with greater ESG focus by companies, have turned environmental responsibility from a regulation into core focus of every business. Today, businesses in different industries need scientific, expandable and practical solutions to ensure both growth and sustainability.

Positioned at the intersection of regulatory compliance and environmental innovation, Eco Paryavaran Laboratories & Consultants has emerged as a trusted problem solver for businesses across infrastructure, manufacturing, construction, and beyond. The firm is more than a laboratory, providing a full range of services that help clients comply with environmental requirements. By handling environmental clearances and providing on-site monitoring, the firm has been successfully helping clients meet the rules and prepare for the future.

Holistic Solutions Backed by National Recognition

Eco Paryavaran Laboratories & Consultants has grown through its persistent efforts to stay excellent and meaningful. A simple laboratory setup in the past is today recognized as one of India's pioneering environmental consultancies. Due to its strong focus in North India, the firm has been approved as a state laboratory for Jammu & Kashmir and Himachal Pradesh. Additionally, being Category-A accredited by QCI-NABET allows its consultancy arm to conduct EIA/EMP studies for 10 major industrial sectors. Furthermore, as an IGBC-accredited Green Building Consultant, the firm continues to make a difference in helping India build green infrastructure.

The firm is built around a varied and coordinated set of services. It specializes in air, water, noise, wastewater, soil, sludge and civil material testing, and offers services that go beyond analyzing numbers. It provides detailed strategies,

analyzes what needs to change and help put solutions into practice. "Eco Paryavaran Laboratories & Consultants is known for making its own water/wastewater treatment systems, including the EcoOxo+TM nanobubble-based solution which offers chemical-free, energy-efficient solutions for improving water quality", says Dr Sandeep Garg, Managing Director, Eco Paryavaran Laboratories & Consultants.

Turning Compliance into Competitive Advantage

Being approved by NABL (National Accreditation Board for Testing and Calibration Laboratories) and MoEF&CC, Eco Paryavaran Laboratories & Consultants ensures high-quality results at every step. All tests follow strict QA/QC protocols, recovery checks, calibration traceability are validated under international methods. Furthermore, using a powerful Laboratory Information Management System (LIMS) makes the firm's data even more reliable and easier to access.

Today, Eco Paryavaran Laboratories & Consultants distinguishes itself in a crowded market with its strong science background, focus on practical applications and wide-ranging competencies. All kinds of clients, from governments to private businesses, recognize the firm's strength in offering laboratory services, on-site field services and expert advice in one place. With its certified abilities and deep knowledge, the firm not simply offers compliance, but true transformation.

Charting the Future with Clarity & Commitment

The strength of the firm lies in its team which consists of a dynamic blend of PhDs, M.Techs, environmental scientists, and seasoned field experts. By using talent from different fields, the firm ensures suitable, technically correct and economical solutions suited to each situation. Clients and partners from different fields trust the firm due to its approach that is based on listening, analysing and practical planning.

Moving forward, Eco Paryavaran Laboratories & Consultants is dedicated to developing new ways to protect the environment with digital advancements, innovation and spreading knowledge. By moving into South India and starting to test pharmaceutical and AYUSH products, the firm is further widening its influence. With initiatives such as solar-mediated pond recovery, nature-based water treatment solutions and an Industrial Training Centre, Eco Paryavaran Laboratories & Consultants demonstrates its determination to move forward with science and focus. "With sustainability becoming the norm, Eco Paryavaran Laboratories & Consultants is prepared not only to meet the future, but to shape it", concludes Dr Sandeep.
